Objective

A highly motivated final-year IT student with a strong academic foundation and hands-on experience in programming, web development, and IoT projects. Skilled in full-stack development, problem-solving, and collaborative teamwork. Passionate about utilizing technical expertise to create innovative, user-centric solutions. Seeking an opportunity to apply and enhance skills in a challenging, fast-paced environment while contributing to impactful projects.

Technical Skills

- **Languages:** JavaScript, Java
- **Frontend:** React Js, HTML5, CSS3
- **Backend:** Node.js
- **Databases:** MySQL
- **Tools:** GitHub, VS Code

Projects

Weather App   *June 2025*
Technologies: HTML5, CSS3, Javascript

- Real-Time Weather: Displays current weather conditions (temperature, humidity, etc.) based on user input for any city.
- Responsive Design: Built with clean HTML and CSS for a mobile-friendly and visually appealing user interface.
- API Integration: Uses JavaScript to fetch weather data from a public API and dynamically updates the content on the page.

Worldverse (Countries Information's)   *Jul 2025*
Technologies: React JS, Tailwind css

- Global Data Display: Shows essential details of all countries including population, region, capital, and flags.
- Search and Filter: Allows users to search and explore country data interactively.
- Built with React: Developed using React and CSS for a responsive, dynamic, and clean user experience.
